

Who Dunit Scenario

Johnny's mother took him to a movie on a school night, because it was his birthday. She asked him to promise to get right into bed as soon as he got home. He really wanted to go, and he agreed. As a special treat she allowed him to get candy and a large soda at the movie. He came home late and was too wired from the sugar and caffeine to fall asleep right away. His stomach started to ache, and he was up half the night. The next morning he didn't feel like going to school. He was grumpy at breakfast and got into a fight with his brother Mickey. The fight put Mickey in a bad mood. While walking to school one of Mickey's friends Ernest was clowning around with a ball and accidentally hit Mickey on the head with it. Mickey flew into a rage and shoved his friend. His friend shoved back and it became a big fight in front of the school. The principal saw the fight and came outside to stop it. The boys were in such a rage that they didn't notice the principal and accidentally shoved her. She fell down and hurt her back. The principal was so upset that she suspended the two boys. Both Mickey and Ernest's mothers had to take time off of work to stay home with them, since they couldn't go to school. Mickey's mother was very worried that she might lose her job or not be able to complete her work responsibilities. Ernest's mother is a veterinarian and was worried about the animals she was supposed to help that day.
