

New Planet Worksheet

Due to the pollution in the air, the Earth's ozone layer is way too thin. Days are getting hotter and hotter. In a couple of days, the Earth is going to be too hot for humans to survive. NASA has a rocket that will send people to a new planet so that they can repopulate and the human species will not become extinct...the only problem is the rocket can only take 10 people!!!

1. **Cut** out the boxes below.

2. **Decide** which 10 of the 30 people you believe should go to the new planet.

35 year old female
has 3 children
graphic artist
